Communication

Date	29 September 2026
Team ID	6ab2a8af5ccf576cf95a906b
Project Name	Cricket Player Performance Tracking Application: CRICKSTATS
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	WhatsApp Group / Google Meet (10 min)	All team members	Share yesterday's work, today's plan (objects, fields, flows) and any blockers
2	Progress Update	Weekly	Google Meet + Google Sheets (sprint tracker)	Team members, Team Lead	Review sprint story points, milestone status and burndown
3	Issue / Bug Discussion	As Needed	WhatsApp / Google Meet screen share	Member facing the issue, Team Lead	Fix roll-up errors, formula errors, flow failures and page layout issues
4	Stakeholder Review	Bi-Weekly	Google Meet / Microsoft Teams	Team, Mentor / Faculty	Demo completed milestones (Player and Match Performance objects, Lightning App, flow) and collect feedback
5	Final Demo Rehearsal	Once	Google Meet / In-person	Whole team, Mentor	Practice end-to-end demo: login, player entry, match performance, flow, reports and dashboards
6	Documentation & Feedback Sharing	Weekly	Google Drive / Email	Whole team, Mentor	Share documents, screenshots and feedback; keep a single version of the report

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Confusion in data model design, such as master-detail vs lookup and the order of creating roll-up summary and formula fields.	Held a Google Meet discussion with screen share, referred to Salesforce Trailhead documentation, and fixed the build order: objects, relationships, roll-ups, then formulas.
2	Team members had different college timings and availability, so meetings were often missed.	Fixed a common daily slot for the standup, used a WhatsApp group for quick updates, and shared meeting notes so absent members could catch up.
3	Changes by different members in the same Salesforce org caused overwritten or duplicate fields and inconsistent configuration.	Assigned one owner per module (objects, UI, automation), logged every change in the shared tracker before editing, and did a weekly review of the org setup.
