Scalability & Future Plan

Date	29 September 2026
Team ID	6ab2a8af5ccf576cf95a906b
Project Name	Cricket Player Performance Tracking Application: CRICKSTATS
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Only basic statistics: AVG Score is runs per match, and there is no strike rate, bowling average or economy rate	Analysts get limited insight for player comparison and team selection	High
2	Requires a Salesforce license and internet connection; offline access is limited	Data cannot be entered from grounds with poor network; a paid license is needed beyond the Developer org	Medium
3	Single access level: the app is assigned only to the System Administrator profile, and no validation rules are applied to match data	Coaches, managers and analysts cannot use the app with separate permissions; incorrect entries are possible	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Small number of users (admin, coach, manager, analyst) in a Developer Edition org for one team	Move to Enterprise / Professional Edition; use roles, profiles, permission sets and sharing rules to support many teams and users
2	Data Storage	One Match Performance record per player per match; Developer org has limited storage	Use paid-edition storage, archive old seasons (Big Objects or external storage) and add more storage as leagues are added
3	Performance	Roll-up summaries, standard reports and a flow with data table for one team	Use indexed fields and report filters, scheduled reports and dashboard refresh, and move heavy calculations to scheduled flows or Apex batch jobs
4	Security	Basic access through System Administrator profile	Create separate profiles and permission sets for coach, manager and analyst; use field-level security, multi-factor authentication and audit trail

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 2	Validation rules, record types (Domestic / International), strike rate, bowling average and economy rate formulas, role-based profiles	1 - 2 months	Accurate data entry and deeper performance analysis
Phase 3	Salesforce mobile app for live data entry, and a public statistics portal using Experience Cloud	3 - 4 months	Faster updates from the ground and wider access to statistics
Phase 4	Multi-league support, player ranking system, AI-based performance prediction and video analysis integration	6 months and above	Smarter team selection and support for many teams and leagues
